PROFESSIONAL SUMMARY

Third-year B.Tech IT student specializing in AI/ML engineering and full-stack development. Built and deployed VaidyaScribe, a production multilingual AI healthcare application using LangGraph, Groq API, and Docker. Proficient in Python, React, AWS (Lambda, SAM), LLM orchestration, and RAG architectures. Proven track record of delivering working prototypes from concept to deployment.

PROJECTS

VaidyaScribe – AI Clinical Documentation System | Python, LangGraph, FastAPI, React, Docker | [Live Demo](#)

- Built full-stack multilingual (Tamil/English) voice-to-SOAP clinical documentation system using Groq Whisper API, NLLB-200 translation, and Ollama LLM with 5-agent LangGraph pipeline for hallucination-resistant medical note generation
- Deployed production-ready application using Docker, nginx reverse proxy, and real-time WebSocket for streaming transcription; achieves 60% accuracy in noisy clinical environments with 30sec processing time
- Integrated scispaCy NER for medical entity extraction, SQLite+LanceDB for vector storage, and QA validation gate to ensure clinical accuracy—fully free tech stack for resource-limited healthcare settings

AI Resume Analyzer & Job Matcher | React, AWS Lambda, DynamoDB, Groq API | [GitHub](#)

- Developed serverless resume analysis platform using AWS SAM with 6 Lambda functions, S3 encrypted storage, and DynamoDB for scalable resume parsing, skill extraction, and job matching
- Implemented hybrid AI approach: TF-IDF cosine similarity for job matching, rule-based NLP with 3,000+ skills ontology for extraction, and LLM-powered (Llama 3.1) chat assistant for resume Q&A and cover letter generation
- Built React frontend with Tailwind CSS and designed complete UI/UX in Google Stitch; Engineered ATS compatibility scoring, skill gap analysis, and experience-level classification

RELEVANT EXPERIENCE

Python Full Stack Virtual Intern | EduSkills Academy (Remote) | Oct 2024 – Dec 2024

- Developed web applications during coursework in full-stack web development using Python, Flask, and modern web frameworks

EDUCATION

Bachelor of Technology in Information Technology

Sri Manakula Vinayagar Engineering College, Puducherry | CGPA: 7.74/10 | 2023 – 2027

Higher Secondary (Class XII)

St. Patrick Higher Secondary School, Puducherry | 74.33% | 2022 – 2023

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, C, Java
- AI/ML & Data: LangChain, LangGraph, Ollama, HuggingFace, OpenCV, Groq API, scispaCy, NLLB-200, Pinecone
- Web Development: React, FastAPI, Flask, REST APIs, WebSocket, Vite
- DevOps: Docker, nginx, AWS (Lambda, S3, DynamoDB, API Gateway, SAM)

HACKATHONS & COMPETITIVE EVENTS

- Smart India Hackathon (SIH) 2024: Selected among top 25 college teams; developed alumni networking portal as team lead, collaborating on full-stack implementation and API design
- Google Agentic AI Webinar (Bangalore Meetup): Attended technical session on autonomous AI agents and LLM-based application architectures
